ROEMHELD

Engine Stand EVO

Safe positioning of heavy engines

Mobile, manual engine and gearbox assembly stand with lifting and swivel axes

for ergonomic, safe and efficient working.

- *Max. load capacity 400 kg*
- *Max. bending torque 2000 Nm*
- *400 mm stroke*
- *Infinite rotation*
- *Manual operation**

Part no. 6401 220

€4,495
Valid until 30 June 2027

* Rotation axis with SW 13 hexagonal shaft / Lifting axis with foot pump

CE-certified
Tested safety and tried-and-tested industrial components ensure maximum reliability – even in daily workshop use.

Long service life
Outstanding material and manufacturing quality, as well as maintenance-free technology, ensure long-term, reliable operation.

Sturdy
Thanks to its steel base frame, the stand remains stable when the castors are locked and is still easy to move when unlocked.

Self-locking in any position
Motors remain securely in the needed working position at all times – even under heavy loads.

Manual operation
Lifting and rotation are carried out manually. The stand is ready for use without a power connection and offers flexibility in the workshop.

Comprehensive & After-sales Service
Personal, reliable and professional – we continue to support you with first-class service even after your purchase.

Ergonomic working
The manual vertical and rotary axes make it easier to move and position heavy workpieces.

Speed
The backlash-free axes and the motor's stepless positioning save time, simplify assembly work and increase precision.
