

***moduhub* – The Module System for Assembly and Handling Technology**

Heavy workpieces
quick, safe and ergonomic
handling and assembly

Easy handling of heavy loads – more productivity

Handling and manual assembly of heavy loads offer a high potential for rationalisation. Using the *moduhub* modules and module combinations, easy handling and assembly is always assured in the optimum position.

moduhub function modules

Lifting modules for lifting and lowering of workpieces
for the adjustment of the optimum working height

Modules for rotating, tilting and swivelling of workpieces
for the adjustment of the optimum working height

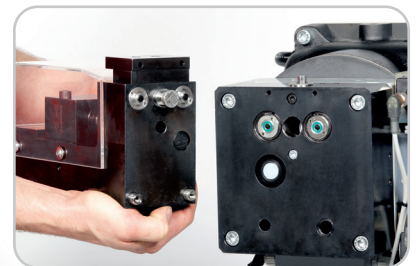

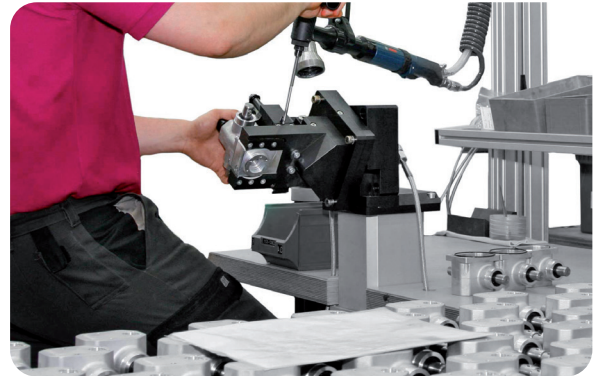

Clamping modules and assembly fixtures
for safe fixing of the workpiece

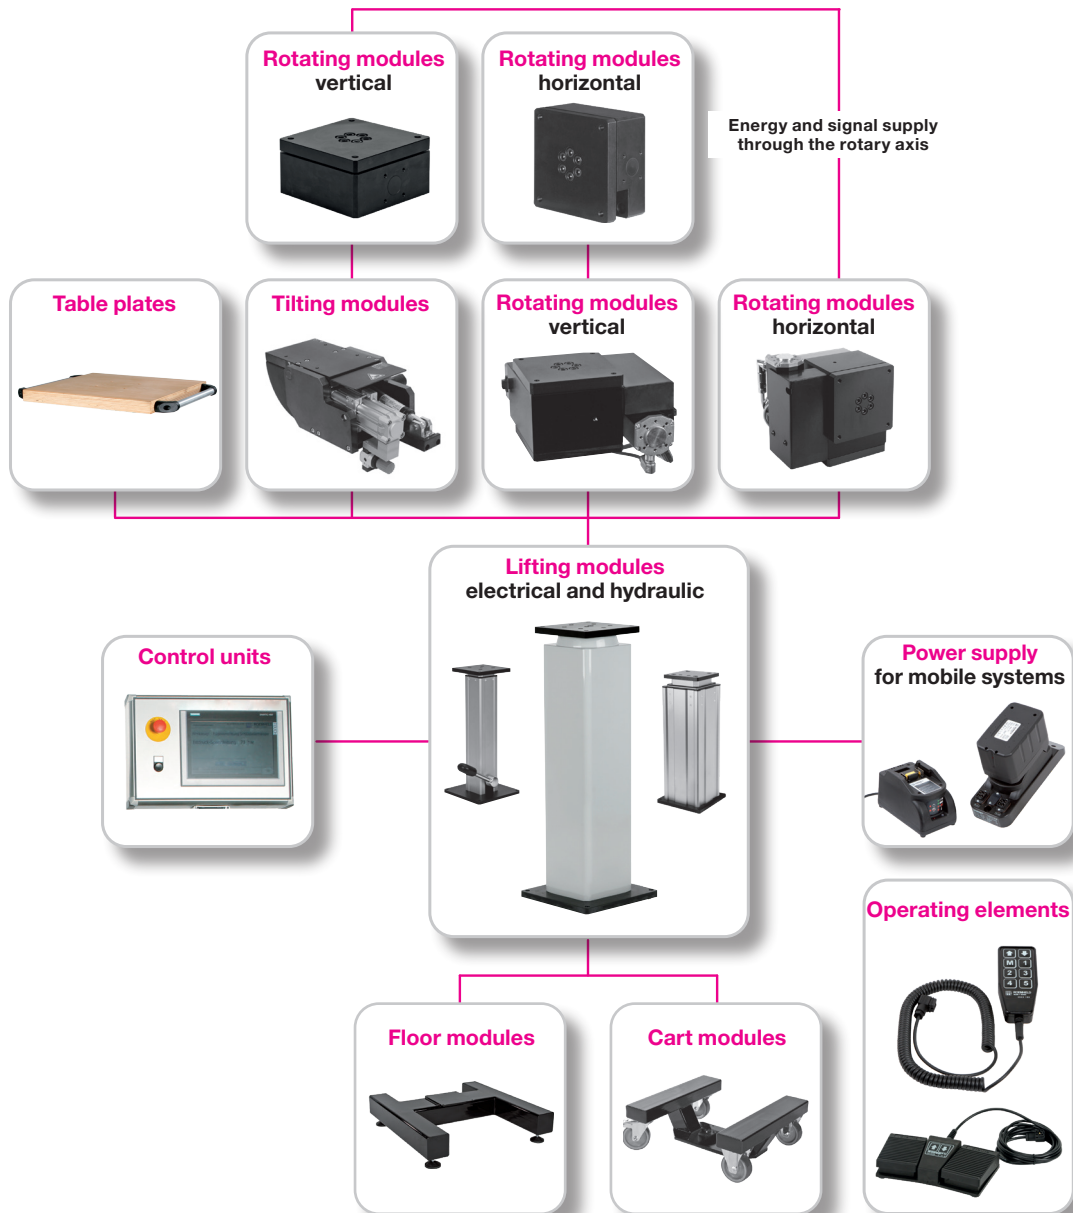

Cart modules
for a mobile use of the installations

Command modules
for safety functions and partial automation

Your benefits by *moduhub*

- ✓ Reduction of assembly costs
by quicker and easier assembly
- ✓ Increase of assembly throughput
by possible partial automation
- ✓ Reduction of the strain of the fitters
by ergonomic handling and assembly
- ✓ Improvement of work safety
by better automation of clamping processes
- ✓ Increase of employee motivation and satisfaction
by modern industrial assembly working places
- ✓ Increase of assembly quality
by individually adaptable working places
- ✓ Respond flexibly to new requirements
by fast retrofitting of new modules
- ✓ Compensate for varying utilization
by system integrated modules
